

EKOGUARD

4MP DUAL LENS 4G SOLAR CAMERA

ET-6003

- 4MP resolution for HD image quality.
- Support motion detection functionality (implied through the PIR motion sensor).
- Support remote monitoring on mobile phones and PC to view live video anytime, anywhere.
- Solar panel powered, 4G connectivity, 100% wireless.
- Built-in PIR motion sensor to trigger recording and alert immediately.
- Achieve active defense with humanoid detection: triggers alarms and lights upon intrusion, with real-time notifications.
- Support Micro SD card storage, ensuring safe storage of video data.
- Support video playback functionality (implied by the overall feature set).
- Employ both white light and infrared light; supporting both B/W night vision and full-color night vision.
- Wide viewing angles: 270° horizontal and 90° vertical view.
- IP66 waterproof, 4000V lightning protection, and anti-surge.
- Ultra-low power consumption, ultra-long standby.
- Three installation options: ceiling, wall, and pole mounting.
- Compact 2-inch body made from engineering plastic; outdoor rainproof, fashionable, and durable.
- Dual-lens zoom design: 10x electronic magnification for both panoramic and detailed views.
- Support MIC and speaker, with two-way audio and clear voice.

EKOGUARD II

3MP DUAL LENS 4G SOLAR CAMERA

ET-6004

- 3MP resolution for HD image quality.
- Support motion detection functionality (implied through the PIR motion sensor).
- Support remote monitoring on mobile phones and PCs to view live video anytime, anywhere.
- Solar panel powered, 4G connectivity, 100% wireless.
- Built-in PIR motion sensor to trigger recording and alert immediately.
- Achieve active defense with humanoid detection: triggers alarms and lights upon intrusion, with real-time notifications.
- Support Micro SD card storage, ensuring safe storage of video data.
- Support video playback functionality (implied by the overall feature set).
- Employ both white light and infrared light; supporting both B/W night vision and full-color night vision.
- Wide viewing angles: 350° horizontal and 150° vertical view.
- IP66 waterproof, 4000V lightning protection, and anti-surge.
- Ultra-low power consumption, ultra-long standby.
